

# ZIP FILE HOW TO

1. Click the zip file you want to download
2. If a window pops up asking what you want to do, select  
“Save this file”  
or  
“Save this file to my computer...”
3. Navigate to the folder on your computer where you want to save the song
4. Click “Save” or “OK”

## NOW YOU NEED TO “UNZIP” YOUR FILE

1. Navigate to the place that you saved the zip file
2. Right Click the zip file
3. Select  
“Extract All”  
or  
“Unzip”
4. Follow the directions in the “Wizard”

This will create a folder with the same title as the zip file. It will contain all of the songs that you downloaded. You can **IMPORT** each song or the entire folder into your music player.

### **IMPORTANT:**

Just saving and unzipping the songs to your computer will not automatically make them accessible to your music player (like iTunes or Windows Media Player). You need to **IMPORT** the songs or the entire folder into your player.
